

Behind Me!

Like "Front", "Behind Me" creates an immediate visual block. This cue is handy when there are no physical visual barriers available in your environment.

Cue "Behind Me!" and drop a handful of snacks onto the ground behind your body.

As your dog forages for the snacks, give lots of verbal praise and encouragement.

Repeat this cue frequently in neutral environments. Once the cue is well-known, use it while your dog is under threshold to help avoid a reaction.
