

Magnet Hand

Move through a tight space while keeping your dog close to you with Magnet Hand! This quick tool is great for moving short distances.

Grab a handful of small, tasty snacks and close them up into your fist.

Position your closed fist close to your dog's nose. Release a steady stream of snacks, one after the other, into your dog's mouth while encouraging them to stay close.

Variation: Hansel & Gretel

If your dog is low to the ground or very grabby with the food, you can drop or place the snacks on the ground. Make a trail of treats close together to maintain a high rate of reinforcement.
